Education

National Institute of Technology, Kurukshetra B.Tech in Electrical Engineering	2023 – 2027 CGPA: 8.35
GVN – The Global School Central Board of Secondary Education	2022 – 2023 90.40%
G.S Convent School Central Board of Secondary Education	2020 – 2021 93.0%

Projects

InterviewIQ – AI-Powered Interview Preparation Platform <i>React.js, Node.js, Express.js, MongoDB, Claude AI, Firebase, Razorpay</i>	GitHub Live Demo Nov 2025
--	------------------------------

- Built a full-stack SaaS platform that parses resumes and generates personalized interview questions using Claude AI.
- Designed real-time answer evaluation system scoring Confidence, Communication, and Correctness in under 2 seconds.
- Implemented secure authentication (Firebase + JWT) and credit-based payments via Razorpay.
- Deployed scalable MERN application with REST APIs, file handling, and optimized backend architecture.

FraudShield – AI-Powered Credit Card Fraud Detection System <i>Python, XGBoost, SHAP, Streamlit, Scikit-learn, SMOTE, Plotly</i>	GitHub Live Demo Jan 2026
--	------------------------------

- Developed a fraud detection system using XGBoost trained on 284K+ transactions, achieving ROC-AUC of 0.974 and 99.4% accuracy.
- Applied SMOTE and class-weight balancing to handle extreme class imbalance
- Integrated SHAP explainability to provide per-transaction insights and feature impact visualizations.
- Automated fraud report generation using Claude AI, converting predictions into analyst-readable summaries.
- Built and deployed an interactive Streamlit dashboard supporting real-time predictions and batch CSV analysis.

Technical Skills

Languages: C, C++, Python, JavaScript

Data Tools: Excel, MySQL, Power BI, Tableau

Libraries/Frameworks: React.js, Node.js, Express.js, Scikit-Learn, Pandas, NumPy, Matplotlib, Streamlit

Tools: Git, GitHub, Postman, VS Code

Core: Data Analysis, EDA, Visualization, Machine Learning, REST APIs

Achievements & Training

- Solved **300+ DSA problems** on LeetCode across multiple difficulty levels.
- Selected as a **Deccan AI Expert**, qualifying for paid AI/ML projects after evaluation.
